

better relationships through a deeper understanding of today's youth culture

# THE IMPLICATIONS OF GROWING UP IN CYBER SPACE

Cyber space is a real place where the boundaries of our reality no longer apply. We live with the illusion that the cyber environment is safer than real life. We give little thought to how it is transforming our kids' lives.

This seminar will take a detailed look at how cyber space is quietly shaping the behaviours of children and teens online. Topics covered will include addictive behaviours, selfies, sexting, toddlers and tablets, narcissism, cyber romance, and the need for endless feedback from people they don't even know.

**Presented by Paul Robertson**, Youth Culture Specialist, Youth Unlimited (Toronto YFC).

Paul is a father of four sons and grandfather to five boys and a girl. He is in his fifth decade of working with parents and youth. After teaching high school for five years, Paul has been with Youth Unlimited for 37 years. He has spoken extensively throughout Canada and the United States.
